

2020

BIOLOGICAL FIELD TRIAL RESULTS

 **Baldwin, WI**
Location

 **Corn**
Crop Type

 **2290 VT2P RIB**
Seed Hybrid/Variety

 **In Furrow**
Application Method

envita+IONfx™
Biological

2290 VT2P RIB
Seed Hybrid/Variety

15.7% -vs- **17.3%**
Control Moisture vs. Treated Moisture

189 -vs- **214.7**
Control Bu/Acre vs. Treated Bu/Acre

25.7
Bu/Acre
ADVANTAGE

Notes:

Envita is a nitrogen fixing solution that changes the nitrogen on your farm. Envita can be used for in-furrow or foliar application. Envita colonizes and lives in the plant (both in above and below ground tissue) to enable nitrogen fixation throughout the plant. IONfx™ is a mix of genetically identified and patented bacteria, along with archaea and fungi. While many microbes live naturally in a plant, this mix of microorganisms has been selected to support, enhance, or supplement plant functions. IONfx™ unlocks a plants ability to produce growth regulators and metabolites.

For additional plot details, contact your local YMS representative or email info@yieldmastersolutions.com.
