Notes:

Envita is a nitrogen fixing solution that changes the nitrogen on your farm. Envita can be used for in-furrow or foliar application. Envita colonizes and lives in the plant (both in above and below ground tissue) to enable nitrogen fixation throughout the plant. IONfx™ is a mix of genetically identified and patented bacteria, along with archaea and fungi. While many microbes live naturally in a plant, this mix of microorganisms has been selected to support, enhance, or supplement plant functions. IONfx™ unlocks a plants ability to produce growth regulators and metabolites.
